Summary

Backend Developer with 2.5+ years of experience building scalable applications and REST APIs using Python, Django, and Django REST Framework. Experienced in trading platforms, third-party integrations, Redis, SQL/NoSQL databases, and performance optimization.

Professional Experience

Backend Developer Intern 04/2024 – 09/2024 | Mumbai, India

Codesis Technologies

- Developed scalable RESTful APIs using Python, Django, and Django REST Framework for trading applications.
- Optimized Django ORM queries and database operations to improve API performance and response times.
- Worked with SQL databases for data handling, query optimization, and high-volume transactions.
- Integrated third-party payment gateways for secure transaction processing.
- Tested and debugged APIs using Postman and resolved backend issues to improve system reliability.
- Supported production systems and contributed to performance and scalability improvements.

Python–Django Developer 10/2024 – 09/2026 | Mumbai, India

Codesis Technologies

- Developed scalable backend systems and RESTful APIs using Python, Django, and Django REST Framework for trading platforms.
- Integrated broker platforms including TradeLocker and DXTrader for real-time market data and trade execution.
- Implemented Redis caching and optimized database queries to improve API performance and response times.
- Integrated payment gateways including Stripe, Razorpay, and CoinPayments for secure transaction processing.
- Worked with PostgreSQL, MySQL, and MongoDB for database design, query optimization, indexing, and high-volume data processing.
- Built data processing workflows using Pandas and NumPy for financial calculations, reporting, and analytics.
- Developed backend architecture for Collect Eaze, a case management platform for loan recovery and EMI collection workflows.
- Integrated third-party telephony and dialer services to support automated calling, call handling, and real-time call status tracking.

Skills

Python
Python, Object-Oriented Programming, Data Structures, Exception Handling, Async Programming

Django & Django REST Framework
Django, Django ORM, REST API Development, Serializers, ViewSets, Authentication, Permissions

Databases
PostgreSQL, MySQL, MongoDB, SQL, Indexing, Query Optimization

Redis & Celery
Redis Caching, Celery, Background Tasks, Task Queues, Scheduled Tasks, Asynchronous Processing

API & Third-Party Integrations
REST APIs, Payment Gateways, Twilio, Telephony/Dialer Integration, TradeLocker, DXTrader

Git & Development Tools
Git, GitHub, Postman, JIRA, API Testing, Debugging

Projects

Collect Eaze
Loan Recovery & Case Management Platform
- Developed backend services for a loan recovery and case management platform using Python, Django, and Django REST Framework.
- Built APIs for portfolio management, case allocation, campaign management, and telecaller workflows.
- Integrated third-party telephony and dialer services for automated calling, call handling, and call status tracking.
- Implemented background processing using Celery and Redis for data processing and campaign workflows.
- Worked with SQL and MongoDB for handling high-volume case and portfolio data.
- Developed automated case allocation and campaign workflows to streamline EMI collection operations.

Trading Platforms
Real-Time Trading & Broker Integration Platforms
- Developed and maintained backend systems for trading platforms including CK Capital, Equity Edge, Fortuna, and Propel using Python, Django, and Django REST Framework.
- Built REST APIs for trading operations, account management, transactions, and real-time data processing.
- Integrated broker platforms including TradeLocker and DXTrader for market data and trade execution.
- Implemented Redis caching and optimized database queries to improve API performance and reduce response times.
- Integrated Stripe, Razorpay, and CoinPayments for secure payment processing.
- Worked with SQL and MongoDB for high-volume financial data, query optimization, indexing, and data modeling.

Education

Bachelor of Science (B.Sc.) in Information Technology 06/2020 – 05/2023 | Mumbai, India
K.E.S. Shroff College of Arts & Commerce, University of Mumbai
CGPA: 8.83 / 10

Certificates

Python (IBM Certified)
Completed foundational and intermediate Python training and certification through IBM.

Python & Django Development
Focused on building REST APIs, Django ORM, and scalable backend architecture

SQL
Additional information: Strong understanding of database design, joins, indexing, and query optimization

Languages

- English
- Hindi
- Gujarati
